PRINTER COMPATIBILITY
Media specifically developed for and widely used with the following machines: HP Scitex / Nur / ColorSpan, EFI (Vutek), Roland, Mutoh, Mimaki, Seiko, Agfa, Océ, DGI, Gandinnovations, Teckwin, Graphtec, Flora, Infinity, Yselan, Durst, Inca & Zünd. Printer compatibility for Water based products: for water based ink-jet printers with both dye and pigmented inks. Suitable for use with: HP, Roland, Mutoh, Encad, Mimaki, etc.
UV INK-JET PRINTING
The Ri-Jet series of ink-jet print media give excellent print results with UV ink-jet printing. However, consideration should be given to the type of applications where such printed media is used, and ensure the appropriate series of UV inks are employed. Certain UV inks can embrittle PVC, so heavy ink lay down with this inks is not advised, less well, and so caution should be given for applications such as floor graphics. Leaving an unprinted border and the correct choice of inks is advised. Please consult your Ritrama representative for further advice and guidance.

WARNING
Testing for suitability between media, printers and inks is always recommended prior to use. Optimum print quality is obtained with correct profiling. For 'print and cut graphics' it is recommended that should be fully dried before application. Residual solvents are known to have a detrimental effect upon the adhesive performance, as well as altering the film characteristics. Overlamination of insufficiently dried graphics can spoil the print appearance.
WARRANTY
For Large Format Digital Printing and in particular for vehicle wrapping Ritrama provides you with a Warranty for RI-JET Vinyl Print Media and Overlaminating Films, Cast & Polymeric materials, when combined with the respective laminations. There are also available Application Guidelines for a correct material use. For any further information contact your Sales Ritrama Representative.
NOTES
To find out which products are held in finished rolls / stock, contact your local Ritrama representative. (1) Minimum quantity required. Other backings available. (2) Core: 6 inches available on request. Roll lengths: also 150m or 200m with minimum ordered quantity. (3) Relates to life of the film only - life of print depends on inks used and techniques. (4) Products available with Minimum Order Quantity. (*) Shelf Life: 6 months, applicable to the film only at stored at a temperature of 22°C ± 2°C and 50 ± 5% of Relative Humidity in the original packaging.

Recommended Storage & Handling (especially relevant to Digital Print Media)

Always store rolls on their end (i.e. vertically) – not on their side (unless rolls are suspended).
Do not handle material without gloves – if this is not possible, remove the outer lap prior to printing.
For optimum print results material should be used within 6 months from manufacture.
Store in air-conditioned premises, ideally 21°C, 55% RH.

NOTES

To find out which products are held in finished rolls / stock, contact your local Ritrama representative.
(1) Minimum quantity required. Other backings available.
(2) Core: 6 inches available on request. Roll lengths: also 150m or 200m with minimum ordered quantity.
(3) Relates to life of the film only - life of print depends on inks used and techniques.
(4) Products available with Minimum Order Quantity.
(5) UV inks compatible.
(*) Shelf Life: 6 months, applicable to the film only at stored at a temperature of 22°C ± 2°C and 50 ± 5% of Relative Humidity in the original packaging.
